## EDUCATION

### The University of Auckland

B.E (Honours) in Software Engineering

Auckland, NZ

Graduation Date: Dec 2026

### Rangitoto College

NCEA Level 1, 2, & 3

Auckland, NZ

Graduation Date: Dec 2022

## EXPERIENCE

### Coreflex(코어플렉스)

Software Engineer Intern

South Korea, KR

Nov 2025 - Feb 2026

- Developed and maintained frontend features using React and TypeScript across client web applications.
- Integrated Medallia DXA to capture user interactions, session replays, and behavioural data for CX analysis.
- Collaborated with developers and CX specialists on real client projects

### Mount Wellington Motel

Housekeeping & Front Desk

Auckland, NZ

Jan 2018 - Dec 2025

- Managed time efficiently to complete daily cleaning schedules on time.
- Managed bookings, cancellations, and guest inquiries via phone and email.
- Delivered exceptional customer service through clear communication with guests.

### Honey Cafe

Kitchen Hand

Auckland, NZ

Mar 2022 - Sep 2022

- Assisted chefs with food preparation, including chopping and assembling ingredients.
- Washed dishes and cleaned kitchen equipment to maintain cleanliness.
- Supported kitchen staff during peak hours by handling tasks quickly and efficiently.

## PROJECTS

### UniQ

Centralised Marketplace Website

TypeScript, React

- Built a full-stack marketplace using React, Next.js, TypeScript, and Tailwind CSS for UoA students.
- Implemented backend APIs with MongoDB, Mongoose, and JWT authentication to support accounts and orders.
- Collaborated in a team to deliver a tested, production-ready application using Jest and React Testing Library.

### Swift NZDD

Web3 Hackathon Website

TypeScript, React

- Collaborated in a team to develop a peer-to-peer Web3 application for a hackathon.
- Built the frontend using React and TypeScript, with a responsive UI styled using MUI, HTML, and CSS.
- Implemented backend smart contracts in Solidity, designed the UI in Figma, and pitched the final prototype.

### My Portfolio

Portfolio Website

JavaScript, React

- Built a responsive portfolio website using React, Tailwind CSS, and Vite.
- Added smooth animations and interactive UI with Framer Motion.
- Included project showcase, downloadable resume, and social media links.

### Guess Who

Java App

Java, JavaFX

- Collaborated on an interactive crime-solving game using Java and JavaFX.
- Implemented AI-driven prompts and used concurrent programming to manage game states and timers.
- Used Git/GitHub for version control and team collaboration.
